I am a second-year Bachelor of Computing student at Belgium Campus ITiversity, specializing in software engineering. With a strong foundation in programming, I am eager to apply my skills to real-world projects and collaborate with others to develop innovative software solutions. I am highly analytical and detail-oriented, with a passion for problem-solving and a love for technology. I am a fast learner, with the ability to quickly adapt to new technologies and programming languages.

EXPERIENCE

JANUARY 2022 – DECEMBER 2022

CLERK, AC MILAN GERMISTON FC

Typing reports, letters, and other business documents. Communicate with parents, players, and management, and respond to any queries or complaints. Maintain filing and inventories. Coordinate activities and disseminate information.

FEBRUARY 2023 – PRESENT

TUTOR, BELGIUM CAMPUS ITIVERSITY

Facilitate student learning by helping to clarify specific course content and promote the use of appropriate study strategies.

EDUCATION

FEBRUARY 2019 - 2021

BACHELOR OF AGRICULTURE, UNIVERSITY OF MPUMALANGA

Equipped with agriculture extension skills, knowledge and attitude needed to contribute to building the capacity of farmers to innovate and to engage in market oriented sustainable agriculture production and value adding.

FEBRUARY 2022 - PRESENT

BACHELOR OF COMPUTING, BELGIUM CAMPUS ITIVERSITY

The curriculum contains the theoretical foundation for the conceptualization and modelling of solutions, the use of abstract, analytical, and critical thinking, and it refines the student's ability to recognize and solve problems.
